

eSOne InQuiry Release Notes

What's New?

DeliverHealth is pleased to announce updates to InQuiry, including refinement of the Clinician filter selection list in workflow folders, and relabeling and repositioning the create document feature.

Refined Clinician Filter List

The Clinician selection list, found in the Advanced Filters window of the workflow folders, has been refined to only include clinicians with jobs in the given folder. If a clinician's name is not found in the selection list, there are no jobs from them.

Document Creation

The "Create" link, found in the Patients tab and Preliminary folder when this feature is enabled, has been renamed to **Create Document** and moved to the right side of the

page to avoid confusion with Bulk Actions. This feature allows new documents to be created directly in InQuiry without a dictation.

Minimum Application Requirements

- Operating system: Windows 10
- Web Browser: Chrome, Edge, Firefox
- RAM: 1 GB or higher
- Processor: 1 GHz or faster (32 or 64-bit Architecture)
- Hard Drive Free Space: 1 GB or higher
