eSOne InQuiry Filter Chips in Workflow Folders Coming Soon

What's New?

DeliverHealth is thrilled to announce upcoming enhancements to the workflow folders: an integrated Advanced Search, truncated text, and easy access to supporting documents. The newest features will be released by August 2, 2024.

Key Features

The screenshot displays the eSOne Inquiry interface. At the top, there is a toggle for 'Advanced Search' (marked with a red '1'). Below this are several search filters: 'Contains', 'Patient ID', 'Patient Name', 'Clinician' (set to 'Demonstration User'), 'Location' (set to 'All'), 'Document Type' (set to 'All'), 'Date Dictated', and 'Thru'. A search button is located on the right. Below the filters, the 'Clinician: Demonstration User' is selected, and there are options for 'Bulk Actions', 'Results: 3', 'Default Layout', 'Choose Columns', and 'Results per page: 250'. The main area shows a table with columns: 'Transcription', 'Clinician', 'Document Type', 'Location', 'Date Dictated', 'Comments', and 'Envelope'. The table contains three rows of data. A red '2' points to the truncated text in the 'Location' column of the second row, which has a tooltip showing 'Andaman & Nicobar Is'. A red '3' points to the 'Envelope' column of the second row, which has 'View | Print' links. A red '1' also points to the 'Envelope' column of the first row. At the bottom, there is a 'Legend' button.

	Transcription	Clinician	Document Type	Location	Date Dictated	Comments	Envelope
<input type="checkbox"/>	637144	Demonstration User	Chart	Kolkata	7/14/2024 1:30 PM		View Print
<input type="checkbox"/>	637049	Demonstration User	Chart	Amritsar	5/14/2024 2:14 AM		View Print
<input type="checkbox"/>	637050	Demonstration User	Chart	Andaman & Nicobar Is	5/14/2024 2:31 AM		View Print

- Advanced Search Integration in Workflow Folders:** A toggle button will expand and collapse an Advanced Search panel; the panel will be collapsed by default. This enhancement will allow users to perform complex searches with ease, without opening a separate Advanced Search window.
- Ellipses for Extended Content:** In cases where column content exceeds cell width, text will be truncated and represented with an ellipsis. Upon mouse hover, a tooltip will appear to reveal the complete text. This allows more data to appear on-screen without crowding.
- Enhanced Visibility and Accessibility of Supporting Documents:** A column will be available in the search results grid to provide easy access to view and print letters and envelopes.

Coming Soon

The following enhancements will be available in the coming weeks:

- **Add filter chips to Search All folders.**
- **Advanced Search Integration in Search All.**
- **Expanded Advanced Search Fields:** In response to user feedback, we're expanding the fields available in Advanced Search. You'll soon be able to search by additional criteria such as Account Number, Additional Authenticator, and Comment Tags.
- **Multi-Select for Location, Document Type, and Users:** To further enhance search capabilities, we're introducing multi-select functionality for Location, Document Type, and Clinician in Advanced Search. This improvement will enable users to refine searches across multiple categories simultaneously, boosting efficiency and accuracy.
- **Seamless Infinite Scroll for Search Results:** We're replacing paginated search results with a seamless infinite scroll feature. This update will offer a more fluid browsing experience, allowing you to effortlessly explore and navigate through search results without interruption.

These features, and more, are scheduled for release over the coming months, with each update aimed at improving usability, efficiency, and overall user satisfaction.

Stay tuned for more detailed release notes and announcements as we continue to innovate and improve InQuiry.
