DeliverHealth

eSOne InCommand
MT Validation Rules for
Direct Delivery Notes

Coming Soon

What's New?

DeliverHealth is thrilled to announce the upcoming release of the eSOne Transcription Service, which will run existing MT Validation Rules on InstaNote and ShadowScribe Direct Delivery notes. This enhancement ensures that notes meet specified quality criteria before being delivered to medical providers.

Key Details

Implementation: Existing MT Validation Rules will be applied to InstaNote and ShadowScribe Direct Delivery notes that would typically skip MLS editing before being delivered to InQuiry.

Criteria: Validation rules will only be enforced if the validation rule criteria are met.

Validation Process: Notes will undergo automated validation checks based on configured MT Validation Rules.

Actions on Validation Failure: If a note fails the validation, the configured action in the rule will apply:

- It may be marked for QA (Quality Assurance) and/or Review.
- A comment tag may be applied to provide specific feedback.

Impact:

- **Benefit:** Ensures that notes maintain high quality standards even if they bypass MLS editing.
- **User Experience:** Users will experience more consistent quality assurance across all notes processed through the eSOne platform.

Release Schedule: This feature will be included in the next update scheduled for the week of July 29 - August 2, 2024.

Feedback: We welcome your feedback on this new feature to continuously improve our services. Please reach out to our support team with any questions or suggestions.
