Inquiry Updates to Comment Tag Analysis Report

Release Notes

What's New?

DeliverHealth is pleased to announce several updates to InQuery's **Comment Tag Analysis** report.

Comment Tag History

Users can now use the report to view a history of all comment tags added to a transcription, along with which version they were added to. To display this data, a new 'Version' filter and two new columns have been added: 'Comment Tags' and 'Revision'.

The resulting report will show any comment tags that were applied to versions between the original and the current.
