

# eSOne Printing Agent v2 Beta Release Notes

## What's new?

DeliverHealth is pleased to announce the beta release of InQuiry Printing Agent version 2. This version contains all the conveniences of version 1, plus introduces a new login method and easier maintenance for future development updates.

#### **Beta Release Now Available**

All future enhancements to the InQuiry Printing Agent will be implemented in version 2. If you are interested in early access to InQuiry Printing Agent v2, please contact support today to request it be enabled for all or select users of your InQuiry client.

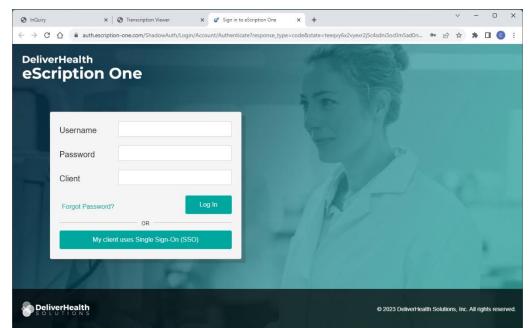

Note: InQuiry Printing Agent v2 can be installed concurrently with version 1. This prevents the need to uninstall and reinstall versions when switching between InQuiry profiles or having the beta version enabled and disabled.

#### **New Login Process**

Logging in to InQuiry	🖶 InQuiry Printing Agent					_

The login page is identical to the InQuiry login page.

After the user submits their InQuiry credentials the Printing Agent will authenticate the user and proceed with the preview or print request.

The log in process is only repeated when a new InQuiry session is started.
