## **eScript One Mobile for iOS v3.5 Release Notes**

## What's new?

DeliverHealth is pleased to announce the release of eScription One Mobile for iOS v3.5. This version includes the updates below, as well as several other minor bug fixes.

### Solved Issues

- Fixed an issue where the 'Folder' field was blank when opening a completed transcription from the Search All folder (search all from the Transcription tab, open a completed dictation and view the Information tab).
- Fixed an issue with 'Complete All' and 'Complete Selected' not updating folder counts in a timely manner.

### Application Requirements

- Any iOS device with iOS 15.2 or greater. Open 'Settings' and tap 'About' then 'Software Version' to confirm that the OS installed is version 15.2+.
- Internet Access through a wireless Local Area Network (LAN) connection or through a phone service provider. It is strongly recommended to use a Wi-Fi LAN connection when uploading dictations. Minimum bandwidth: LTE/4G data connection; recommended is stable Wi-Fi.
- Communicates over port 443 to <https://mobile.escription-one.com> using TLS 1.2.
